

AudioBud User Manual

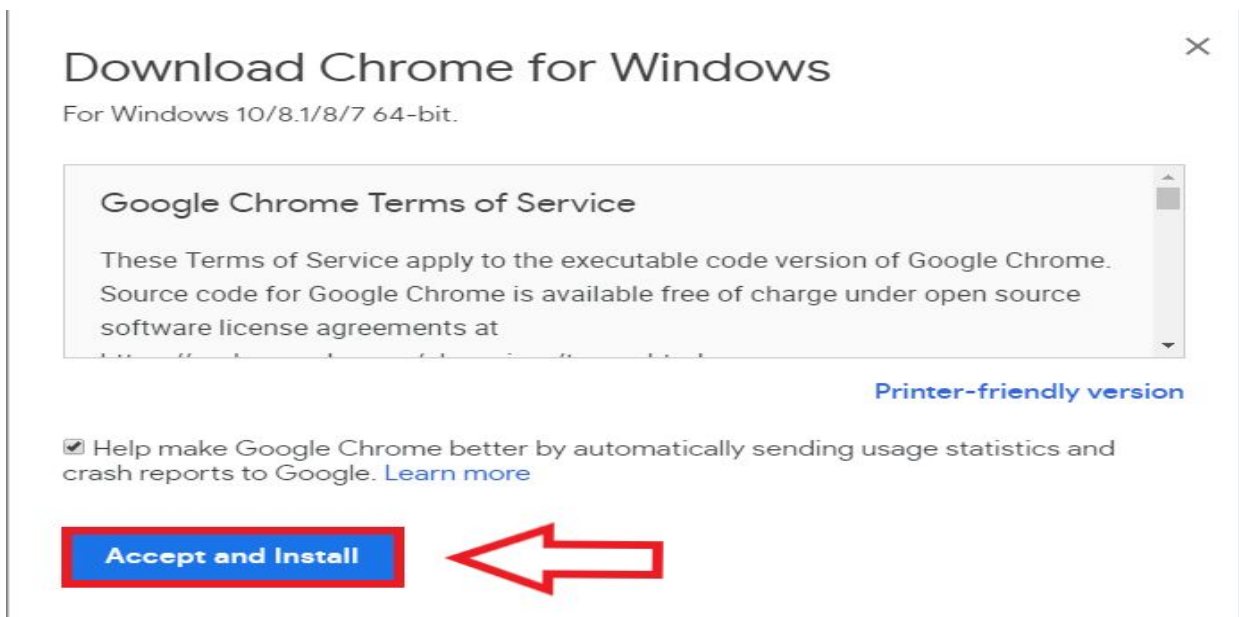

Test Group Don't Ignore

1. Welcome to Test group don't ignore's user's manual. Our application was created to be used as an extension on the Google Chrome web browser. If, you do not have this downloaded then follow the link and picture guide. Download Google [Chrome](#).

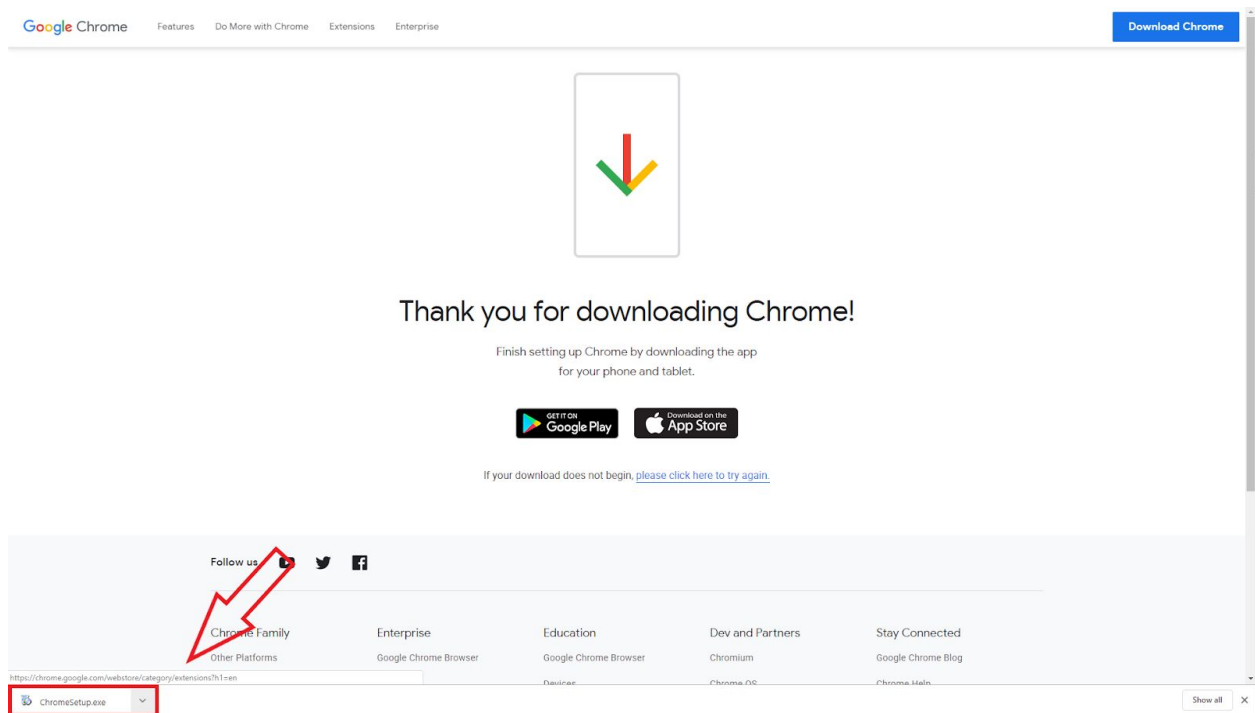

- a. Click the download button.

- b. Click Accept and Install.

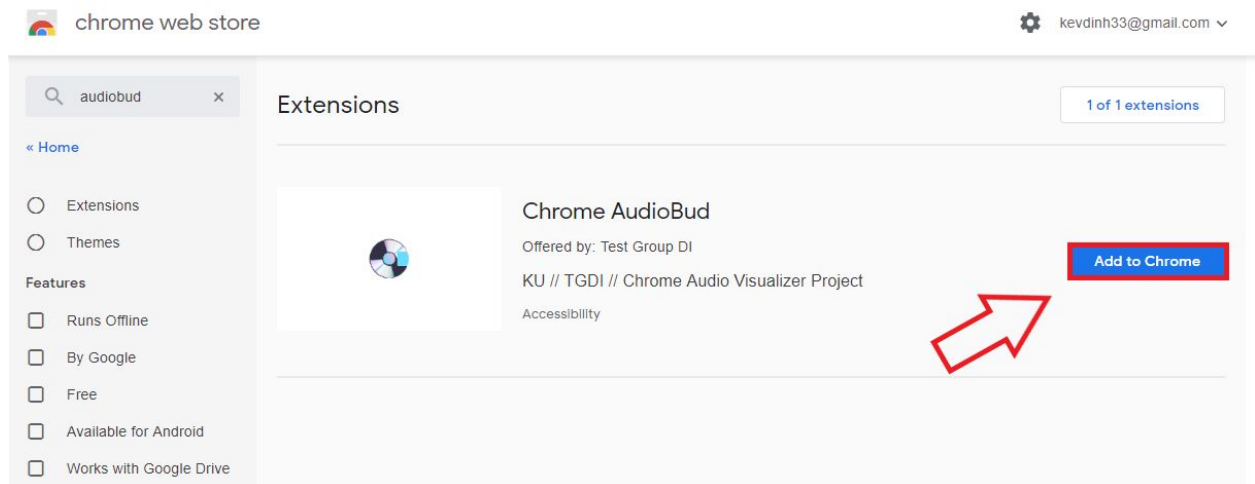

c. Click executable file to download.

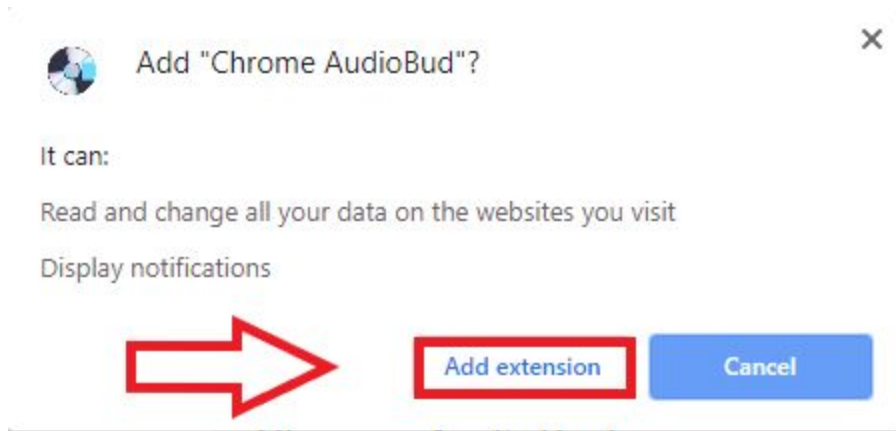

d. Done.

2. Now that you have the Google Chrome Browser installed you can head to the Google Web Store and download our extension for free [here](#).

a. Click Add to Chrome.

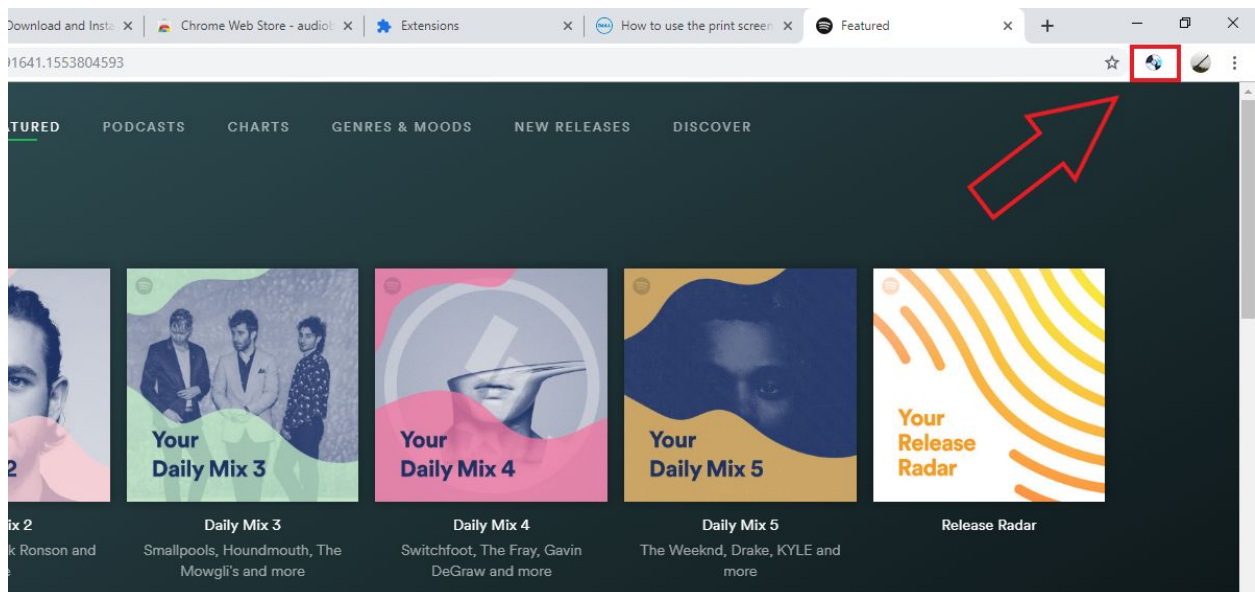

b. Click Add extension.

c. Done

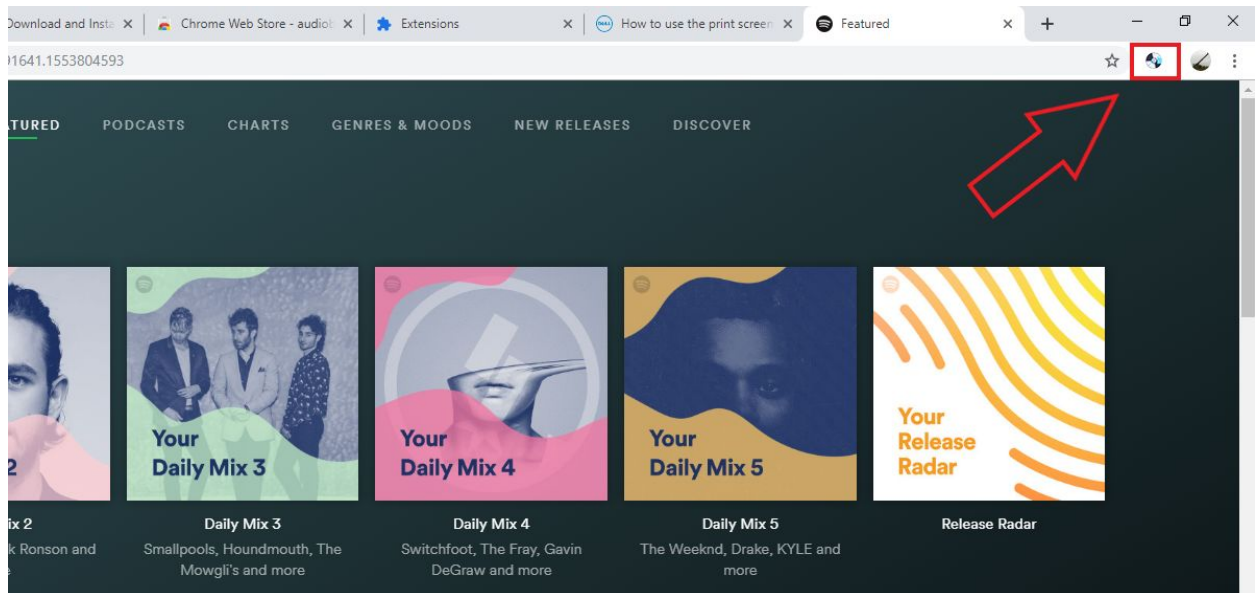

3. Now that you have officially downloaded our extension you can proceed to utilize it with your choice of web based music player i.e. Spotify, Pandora, YouTube, etc. By doing the following:

- a. Play your music on your favorite platform.
- b. Click on the extension located to the right of the address bar.

c. Done.

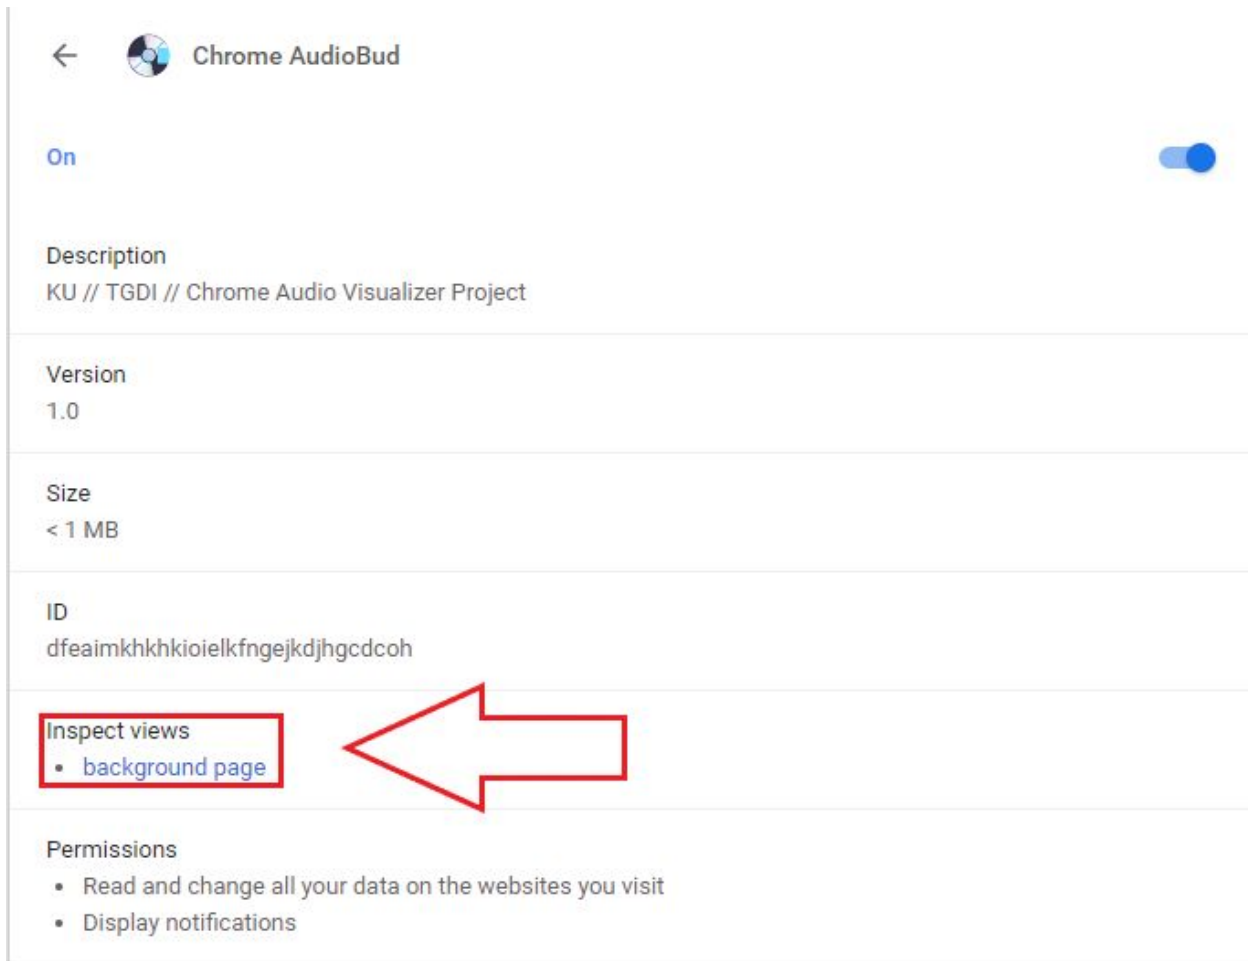

4. That's it just a click of a button and you are using our default audio visualizer. To change the filters and visualizers follow these steps:
 - a. Right click the extension button for a drop down menu:

- b. Click on Options.
 - c. Select your favorite settings.

5. For developer purposes, to look at our testing do the following:
 - a. Right click the extension button and check mark Test mode.
 - b. Then click on Manage extensions in the same drop down menu.
 - c. Under Inspect views. Click on background page.

- d. Make sure the visualizer is going and you will see the tests results in a web console.
